

Senior Analyst Programmer – Malaysia

- Based in Kuala Lumpur, Malaysia

- Annual Salary Package: Negotiable

ERLMS Limited is a professional management consulting firm specialising in providing Organisational & Human Resource Management Consulting, IT System Development & Solution and Executive Search services to companies worldwide.

Our client, a leading Software Security Company, is seeking a number of Senior Analyst Programmers to be based in its office in Kuala Lumpur, Malaysia.

Reporting to System Analyst, your primary responsibilities include:

- Assist the development team in different stages of system development life cycle activities to ensure system development deliverables, documentation and implementation processes are in line with development standards.
- Coordinate with different IT teams to efficiently carry out system development activities.
- Ensure application coding complies with IT application policies, standards and procedures.
- Ensure appropriate controls are built into application software to maximise system stability, security and reliability.
- Assist in reviewing application and system development deliverables during development and implementation phases.
- Ensure application development phases are on track and meeting delivery milestones, quality standards and allocated cost.
- Review, analyse, recommend and develop systems and technologies to improve business and system process efficiency.
- Ensure best practices and standards are applied when designing application systems.
- Assist in preparing application technical specification in accordance to application requirements.
- Assist in analysing system requirements and support in defining and recommending different system approaches to fulfil business and users' requirements.

KEY SKILL AND ATTRIBUTE REQUIREMENTS

- Strong business acumen and result oriented.
- Ability to grasp clarity of business objectives and to facilitate delivery of sound business solutions.
- Good understanding of system development life cycle and quality assurance processes.
- Ability to design and develop programming solutions to complex business needs.
- Hands-on experience in system design and development, including in-depth formal system development experience.
- Ability to work independently and proactively to complete assignments according to defined schedules.
- Strong analytical and problem solving skills and experience.
- Good interpersonal skills, written and verbal communications skills in both English and Chinese.
- Experience in project development, a plus.

WORK EXPERIENCE AND QUALIFICATION

- University degree in Computer Science or related fields.
- A minimum of 4 years experience in software application development for senior analyst programmer
- Experience in developing security application is a plus.
- Proficiency in XML, HTML, JSP, Java Script, J2EE, ASP.Net, Visual Basic.
- Candidates with less years of experience may be considered for Analyst Programmer position.

The Hiring Company would like to have people on board as soon as possible. Interested candidates, please send in your application immediately.

To apply, please email your detailed resume with a covering letter explaining your suitability for the position to ERLMS Limited on executivesearch@erlms.com. Please also indicate in the resume your current and expected salary packages.
